FCS 2025: Towards an AI-Driven Sustainable Future

Looking back at 2024, FCS celebrated its 50th anniversary with the launch of new IMM and the new factory grand opening. The integration of AI-powered fault prediction in the iMF 4.0 smart factory system indirectly contributed to reducing carbon emissions, enabling FCS to surpass its target revenue.

Looking ahead to 2025, with the capabilities of its five global factories fully operational, FCS is actively expanding its global presence and preparing for 30 global exhibitions...
